Course Objectives

What is this Course About?

This course covers algorithm development using

- pseudo languages
- basic program structures
- program design techniques
- storage and manipulation of basic data structures
- **3 Credit Hours**

What is this Course About?

Categories of Data Structures

Linear Ordered

Lists

Stacks

Queues

Non-linear Ordered

Trees

Graphs

Not Ordered

Sets

Tables/Maps

Categories of Algorithms

Brute Force

Selection Sort

Bubble Sort

Insertion Sort

NP Complete Problems

Divide & Conquer

Binary Search

Merge Sort

Quick Sort

Greedy

Minimum Spanning Tree

Shortest Paths

Dynamic Programming

Knapsack

Fibonacci

Logistics & Policies

Format

Action Items by
Monday morning

Watch lectures synchronously on MWF
live or via Zoom.

Attend discussions on
Tue.

1. Conceptual Quiz due on Sun.
2. Programming Quiz due on Sun.

Communication

Slack

- Everything!
 - for all question related to the course
 - for communicating with peers
 - one-to-one communication with me
- Use Appropriate Tags
- Response in < 48 business hours

Office Hours

- Monday, 5-6 pm
- Friday, 1-2 pm
- By Appointment (24 hours in advance)

Communication

Email

Fine for

- **Personal**
- **Accommodations**
- **Emergencies**

Email

Not okay for

- **Questions regarding logistics**
- **Questions on coding**
- **Fixing bugs**

Communication

~~Canvas Messages~~

~~Phone Call~~

Debugging

- Students should visit the course staff during scheduled office hours for help and provide context for help.
- Debugging requests for projects/quiz questions must first go through the TAs or peer mentors. This is strongly encouraged given we have a large class and several of you might have similar questions.
- If your problem is not fixed, then start a conversation with both the Instructor and the TA/Peer mentor who you asked for help. Debugging requests to the Instructor as a Slack direct message or an email will be ignored if you do not follow the above protocol.

Grading

Modality	Assignment	% of Final Grade
Individual	Programming / HTG Quizzes (drop two lowest)	12%
	Conceptual quizzes (drop two lowest)	10%
	Exam 1	20%
	Exam 2 (Cumulative)	20%
	Project 1	14%
	Project 2	12%
Collaborative	Final Project (Individual or Group: 3a & 3b)	12%
Individual	Extra Credit Opportunities & Bug Bounty Program	Up to 3%
		Total: 103%

Total assessments: 26 excluding extra credit and class participation

Timeline

Week	Dates		Topic	Deadlines
1	12-May	18-May	Course Introduction/Algorithm Analysis	Q_1
2	19-May	25-May	List, Stacks, & Queues / Trees	Q_2
3	26-May	1-Jun	Trees / Balanced Trees 1	Q_3
4	2-Jun	8-Jun	Balanced Trees 2	Q_4
5	9-Jun	15-Jun	Heaps & Priority Queues / Sorting	Q_5, P_1
6	16-Jun	22-Jun	Sorting / Exam 1 (June 20)	E_1
7	23-Jun	29-Jun	Summer Break	
8	30-Jun	6-Jul	Sets, Maps, & Hashing	P_{3a}, Q_6
9	7-Jul	13-Jul	Graphs 1	Q_7
10	14-Jul	20-Jul	Graphs 2	Q_8, P_2
11	21-Jul	27-Jul	Greedy Algorithms / Exam 2 (July 25)	E_2
12	28-Jul	3-Aug	Dynamic Programming	$Q_9,$
13	4-Aug	6-Aug	Complexity Theory	P_{3b}, Q_{10}
Legend: Q_N = Quiz N, P_N = Project N, E_N = Exam N Note: The instructor will be traveling for official work on Jun 30- Jul 2, Jul 28 - Aug 1 lectures and these lectures will be prerecorded videos.				

Programming Language

Default (Project 1 & 2, Stepik/Edugator, Quizzes):

C++14

Compilation command:

```
g++ -std=c++14 -Werror -Wuninitialized -o EXECUTABLE_NAME YOUR_FILE.cpp
```

Project 3 or Final Project:

Any Language

Tools

Compiler

- G++
- Stepik/EduGator/Gradescope

IDE

- OnlineGDB
- Visual Studio Code
- Clion

Tools

Directory Structures

- `src` – includes `.h` and `.cpp` files
(You can use `lib/` too for separating interfaces - `.h`)
- `test` – contains test files
- `build` – contains executables (e.g. `.exe`)
- Know basic commands on compilation through command line:
 - `cd`, `ls`, `mv`, `g++`, `pwd` ...

<https://cplusplus.com/forum/beginner/261697>
<https://stackoverflow.com/questions/2360734/whats-a-good-directory-structure-for-larger-c-projects-using-makefile>

Textbook (Optional)

- **Data Structures and Algorithm Analysis in C++**

- Mark Allen Weiss
- Fourth edition, 2014, ISBN 9780132847377

- **OpenDSA Book**

- <https://opensa-server.cs.vt.edu/OpenDSA/Books/Everything/html/index.html>

Feedback

- COP 3530 Feedback Form
- Bug Bounty Program
 - Quiz is not accessible due to a locked module
 - Typo in one of the quizzes/project descriptions
 - Incorrect solution in a certain test case
 - An accessibility bug such as no headings in documents for screen-readers
 - the algorithm has an off-by-one error

Expectations

- **We want you to focus on**
 - Correctness
 - Clean, readable, tested, and documented code
 - Secondary focus on optimization
- **The course will not cover**
 - Mathematical Proofs
 - Design Patterns
 - Competitive Programming

Expectations

Conceptual Quizzes and Exams:

- Work independently
- No discussion at the conceptual level
- You are allowed to
 - discuss solutions after the due date and late days have passed.

Expectations

Programming Quiz questions:

- Work independently or as a pair (Select a buddy in Week 1).
- The buddy must remain the same for the entire course.
- The course staff can help you on syntax issues, but we will not help you with semantic and logic issues for quizzes.
- Cite that you worked with a buddy in Line 1 of your code and add their name.
- You are allowed to
 - discuss solutions after the due date and late days have passed.
 - search for C++ syntax or refer to definitions of standard functions in the C++ library. For example, using the documentation listed here is fine:
<https://www.cplusplus.com/reference/> or <https://en.cppreference.com/w/>

Academic Dishonesty

Project 1 and 2:

- **Work independently**
- Discussion at the conceptual level is fine if you are stuck with no sharing/viewing of code
- **You are allowed to**
 - **discuss conceptually** without discussing any code with a peer provided you cite the peer with who you discussed it. Such discussions should be held **on a whiteboard** using explanation figures/pseudo-codes or through talking.
 - discuss **solutions after the due date and late days** have passed.
 - search for C++ syntax or **refer to definitions of standard functions in the C++ library**.
For example, using the documentation listed here is fine:
<https://www.cplusplus.com/reference/> or <https://en.cppreference.com/w/>

Academic Dishonesty

Project 3 and Edugator ungraded questions:

- It is fine to **collaborate with peers**. You must make sure you are not blindly copy-pasting another student's code. Also, **you must cite the peer you worked** with at the code level or conceptually.

Academic Dishonesty

- Sharing/copying, “borrowing” of code structure, looking at code from another student or providing such code, and plagiarism, in addition to other dishonest behaviors, are all considered to be academic dishonesty.
- No information regarding the project 1 and 2, quiz, and exam solutions may be shared by students. We strongly encourage that if you have doubts, visit the course staff in-office hours. Looking at any piece of your peer’s code, sharing files, searching for solutions found online, or using someone else to code your solution is strictly prohibited.
- Penalty
 - reported to the Honor Court
 - E grade for the course
- Regret Clause:
 - If you submit an assignment, in which you engaged in some of the unacceptable practices, you may bring it to my attention by emailing me and withdrawing your assignment within 48 hours of the submission. If you do so, I will assign a failing grade of 0 for the assignment, and you will not be reported to the administration.

Request for Extensions

- Any request for assessment extensions should be backed by official documentation (e.g., from a medical professional, etc.) and should be sent over email. Requests without documentation will be ignored. The following reasons deem ineligibility for extensions or regrades:
 - **Failure to submit on Canvas by due date/late date.** Example: If a quiz is due at 11:59 pm, and you send the file at 12:01 am, the file will not be graded. Note that most assessments are open for 4 or more days and you must start early and submit it on time. In case you miss an assignment, treat it as a learning activity and avoid that in the future.
 - **Forgetting to turn in an assessment on time.**
 - **File naming issues or feedback issues on projects.** Gradescope gives you feedback and please read it and fix your file and resubmit. Note that you have unlimited attempts on Gradescope for everything and we will not grade your files if you do not adhere to instructions on file submissions and/or if the Gradescope scores your file to 0. It is your responsibility to read the feedback and fix your code. In case you miss reading the feedback, treat it as a learning activity and avoid that in the future.
